SDU OS Slide

Slide for SDU OS

千载文脉凝风骨,根植山大盛芳华

Author: arshyti

Term: 2026 Spring

一、Overview**1.1 Template Goals**

1.2 Writing Model

二、Usage

2.1 Minimal

2.2 Theme Values

三、Overlays

3.1 Pause

3.2 Meanwhile

3.3 Jump

四、Components

4.1 Sidebar

4.2 Code and Keys

4.3 Terms Layout

五、Closing

5.1 Checklist

Feature	Usage
Look	Cover, frame, sidebar, SDU logo, and course-flavored color tokens.
Structure	<code>= Section</code> and <code>== Slide</code> are slide boundaries and sidebar entries.
Animation	<code>#pause</code> , <code>#meanwhile</code> , and <code>#jump</code> provide incremental overlays.
Docs	Public functions are documented with tidy-friendly <code>///</code> comments.

一、Overview

1.1 Template Goals

1.2 Writing Model

二、Usage

2.1 Minimal

2.2 Theme Values

三、Overlays

3.1 Pause

3.2 Meanwhile

3.3 Jump

四、Components

4.1 Sidebar

4.2 Code and Keys

4.3 Terms Layout

五、Closing

5.1 Checklist

- Use markup for prose, lists, headings, and emphasis.
- Use `#` to call functions, read theme values, and generate repeated content.
- Use math mode for formulas, for example $H = -\sum_i p_i \log p_i$.

Heading rule

Level 1, level 2, and level 3 headings start new slide pages. Level 3 headings are rendered as centered red titles.

Start with the public entry point `slide.typ`.

```
#import "slide.typ": setup, theme, pause, meanwhile

#show: setup.with(
  title: "SDU OS Slide",
  subtitle: "Slide for SDU OS",
  author: "arshtyi",
  term: "2026 Spring",
  date: datetime.today(),
  handout: false,
)
```

= Chapter
== Slide Title

Write slide content here.

4.1 Sidebar

4.2 Code and Keys

4.3 Terms Layout

五、Closing

5.1 Checklist

The exported `theme` dictionary contains the shared design tokens.

Feature	Usage
<code>theme.fonts.cover</code>	Cover-page title font.
<code>theme.fonts.content</code>	CJK and Latin fonts for normal slide text.
<code>theme.colors.primary</code>	Main SDU red used for frame, highlights, and active sidebar rows.
<code>theme.page.sidebar-width</code>	Width of the right outline sidebar.

- 3.2 Meanwhile
- 3.3 Jump

四、Components

- 4.1 Sidebar
- 4.2 Code and Keys
- 4.3 Terms Layout

五、Closing

- 5.1 Checklist

Level 3 Slide

This page is created by a level 3 heading. It is not shown in the sidebar, but it is still a slide boundary and is rendered as a centered title.

一、Overview

- 1.1 Template Goals
- 1.2 Writing Model

二、Usage

- 2.1 Minimal
- 2.2 Theme Values

三、Overlays

- 3.1 Pause
- 3.2 Meanwhile
- 3.3 Jump

四、Components

- 4.1 Sidebar
- 4.2 Code and Keys
- 4.3 Terms Layout

3.2 Meanwhile

3.3 Jump

四、Components

4.1 Sidebar

4.2 Code and Keys

4.3 Terms Layout

五、Closing

5.1 Checklist

This example is in presentation mode because `handout: false`. Change it to `handout: true` when you want a distribution PDF with only the final state of each slide.

`#pause` advances to the next overlay. Content after it is hidden first and revealed later.

Always visible.

Visible on overlay 2.

Visible on overlay 3.

Handout Mode

Use `handout: true` for a distribution PDF. In handout mode, every slide is rendered once with the final overlay state.

```
#show: setup.with(  
  handout: true,  
)
```

一、Overview

- 3.2 Meanwhile
- 3.3 Jump

四、Components

- 4.1 Sidebar
- 4.2 Code and Keys
- 4.3 Terms Layout

五、Closing

- 5.1 Checklist

`#meanwhile` resets subsequent content back to the first overlay. It is useful when two groups should build independently.

Left story starts here.

Left story continues on overlay 2.

Right story is visible from overlay 1.

Right story continues on overlay 2.

3.2 Meanwhile

3.3 Jump**四、Components**

4.1 Sidebar

4.2 Code and Keys

4.3 Terms Layout

五、Closing

5.1 Checklist

`#jump` is the lower-level primitive behind `pause` and `meanwhile`.

- `#pause` is the same as `#jump(1, relative: true)`.
- `#meanwhile` is the same as `#jump(1)`.
- Relative jumps can skip or revisit overlay steps when you need manual control.

This line appears after skipping one overlay step.

The sidebar is built from level 1 and level 2 headings.

Feature	Usage
Level 1	Rendered as a section heading in the outline.
Level 2	Rendered as a slide heading and highlighted while active.
Links	Sidebar entries jump to the original heading locations.

五、Closing

- 5.1 Checklist

Inline code uses a quiet gray background, and block code is framed for scanning.

Press `Ctrl` + `S` to save, then compile with:

```
typst compile --root . template/template.typ template/template.pdf
```

五、Closing

5.1 Checklist

- setup** Applies page layout, cover, sidebar, heading rules, and overlays.
- pause** Reveals following content one overlay later.
- meanwhile** Starts a parallel reveal sequence from overlay 1.
- theme** Provides fonts, colors, and dimensions for custom slide content.

5.1 Checklist

- Import from `slide.typ`, not directly from `lib`.
- Use `= / ==` for slide boundaries.
- Use `===` for in-slide section titles.
- Use `#pause` and `#meanwhile` for incremental content.
- Keep custom styles local to the slide when possible.

Next step

Open `docs/manual.typ` for the generated manual and API reference. Use this file as a visual smoke test for template changes.
